Re: WT Docket No. 05-211

Dear Ms. Dortch:

We would like express our continued concern regarding the unprecedented consolidation taking place among large national wireless carriers. Consolidation has the unfortunate effect of significantly disadvantaging small businesses and businesses owned by members of minority groups and women. Nowhere is this disadvantage likely to be felt more than in the acquisition of wireless licenses in the Commission's upcoming wireless license auctions. We therefore strongly support the Commission's proposals to adopt the measures to ensure that small businesses and businesses owned by members of minority groups and women are given a real chance of winning spectrum in future auctions through a meaningful bidding credit that is not accessible to the large national wireless carriers through partnerships. At the same time, given the importance of capital availability to DEs, we do not support expanding the prohibition to relationships with any other communications service providers. Other communications service providers are not dominating the wireless services industry, and they are an important source of capital and expertise for new entrants.

The undersigned Alaska Native Corporations are owned and controlled by Alaska Natives. Over time, these businesses have, through their investments and subsidiaries, engaged in many diverse business interests. We intend to continue to make investments in the communications sector.

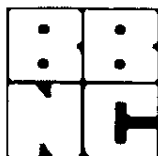

We ask the Commission to adopt the tentative conclusions in the Further Notice of Proposed Rule Making and to see that the prohibition will be enforced in the upcoming AWS auctions.

Sincerely,

Orie Williams
President and CEO
